The day combinations column is now dependent on the Type Column and the SCU column. This means that both the Type and SCU columns need to be placed to the right of the Day Combinations Column. If SCUs AND/OR Type is not filled in, then you will display a message when the user tries to edit day combinations that tells them "Please fill out ____ column before filling out Day Combinations."

Here is the matrix depicting the Day Combinations Column options based on the SCU and Type Column values:
