Inspection Test of Impacts

Currently empty. One or more requirements team member needs to write this, to address the following points:

a. Good things that will happen if the product is installed and used.

b. Bad things that can happen, including but not limited to the following areas:
    i. Distribution problems
    ii. Installation problems
    iii. Regular usage problems

c. Issues raised by Erik Wilkenson's analysis that relate specifically to positive and negative product impacts. If Erik has a specific section devoted to this in his marketing study (new Section 1.6), then you can site that section here, rather than reiterating it.
