Department Assignments, Winter and Spring:

The following is a list of 18 departments who expressed interest in project participation during Winter and Spring quarters of 2012. Of those 18, we chose what we considered to be the 12 most representative and important on the list, and assigned one team member to each of these 12 departments. It is the responsibility of this team member to perform acceptance testing for that department, and liaise with a representative of that department when the product is deployed.
